

MISS JULIE FLORENCE WALSH

WOMEN SUFFER

Many women suffer in silence and drift along from bad to worse, knowing well that they ought to have immediate assistance.

How many women do you know who are perfectly well and strong? The cause may be easily traced to some feminine derangement which manifests itself in depression of spirits, reluctance to go anywhere or do anything, backache, dragging sensations, flatulency, nervousness, and sleeplessness.

These symptoms are but warnings that there is danger ahead, and unless heeded, a life of suffering or a serious operation is the inevitable result. The best remedy for all these symptoms is

Lydia E. Pinkham's Vegetable Compound

made from native roots and herbs. No other medicine in the country has received such widespread and unqualified endorsement. No other medicine has such a record of cures of female ills.

Miss J. F. Walsh, of 328 W. 36th St., New York City, writes: "Lydia E. Pinkham's Vegetable Compound has been of inestimable value in restoring my health. I suffered from female ills which caused dreadful headaches, dizziness, and dull pains in my back, but your medicine soon brought about a change in my general condition, built me up and made me perfectly well."

Lydia E. Pinkham's Vegetable Compound cures Female Complaints, such as Backache, Falling and Displacements, Inflammation and Ulceration, and organic diseases. It is invaluable in preparing for child-birth and during the Change of Life. It cures Nervous Prostration, Headache, General Debility, and invigorates the whole system.

Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Her advice is free.

Smart Styles for Spring.

New York City.—It is a well recognized fact that the stage has a marked influence upon fashions, and here is an exceedingly smart and exceedingly attractive blouse that is modeled closely after the one worn by Margaret Anglin in her success of

the winter. It has the rolling collar and open throat that are so desirable for all sports, and, indeed, for general warm weather wear, and allows a choice of elbow or long sleeves. In the illustration it is made of white handkerchief linen with a finish of stitching and is worn with a blue and

For a Dainty Neck.

There are some very neat little butterfly ties—to be tied by the wearer—in soft silk, embroidered taffeta and linen. They certainly make a beautiful little bow and one which, no matter how "thumpy" one's fingers are, will always be successful. The prettiest collar is certainly a high batiste tuck collar, a tiny batiste dounce either pleated or fluted bordering it. The ties attached to these collars are less worthy of praise, as their ends were trimmed with quite unnecessary little batiste flounces like the collar.

Sectional Walking Skirt.

There is no skirt so well adapted to washable materials as the one with straight lower edges. Here is a model that is graceful as well as new and that is suited alike to plain and to figured fabrics while it can be utilized for silk and for wool quite as well as for cotton and linen. In the illustration it is made of white linen simply stitched, but if a more elaborate effect is desired the hem can be hemstitched and the tucks put in by hand, a finish which gives an exceedingly dainty and altogether attractive effect while it is in the height of style. Again flouncing or bordered material can be used if the hem and tucks either are all omitted or the tiny ones are put in above the design.

The skirt is made in three portions. The lower dounce is hemmed while the upper flounce and the skirt are finished with wide tucks at their lower edges. Above this hem and

white silk tie, but it will be found available for all waisting materials and for the entire dress as well as for the separate blouse. There are a great many lovely soft finished linens this season, all of which are admirable, while cotton goods such as batiste, lawn, voile and the like make up admirably both for the separate waists and gowns. Again light weight and wash flannels are charming so treated and it is well that one or two at least should be included in every summer wardrobe.

The waist is made with the yoke portion, the full fronts and back. The fronts are gathered and joined to the yoke but the back extends to the neck. The sailor collar can be cut on square or round outline in the back. There is a convenient as well as smart patch pocket and the sleeves are gathered into bands whether they are finished with cuffs or with overlaps in shirtwaist style.

The quantity of material required for the medium size is four and a quarter yards twenty-one, two yards thirty-two or two and a quarter yards forty-four inches wide.

Roses For Dainty Gowns.

Tiny artificial roses in natural shades dot lace ruffles on some dainty gowns and form the accompanying hair ornament. Ribbon suspenders and girdle are of the same delicate shade.

Butterflies on Slippers.

As a matter of fact lace butterflies are being employed far more than bows for the decoration of evening slippers, and butterflies in wire, Bruges, Brussels or Honiton lace or Irish crochet are frequently introduced on white shoes as well as those in soft evening shades.

Fillet Laces in Combination.

The fillet laces are best liked when combined with other laces.

these tucks are groups of narrow tucks and each flounce is gathered at its upper edge before the joinings are made. The fullness in the skirt is arranged in lengthwise tucks that are turned outward from the hips and stitched flat, so doing away with all bulk at that point while the additional fullness at the back is laid in inverted pleats.

The quantity of material required

for the medium size is eight yards twenty-seven, five and a quarter yards thirty-six, five yards forty-four inches wide or ten yards of bordered material twenty-nine inches wide.

Coat Material Different.

Skirts of one kind and coats of another are in high vogue, but there is no hit and miss union of the two. The one invariably harmonizes with the other in tone and repeats definitely its leading color. One gown of this kind is of charming pongee, the skirt of plain and the coat of a novelty pongee of two tones. The coat is a loose shape like all the long ones being brought out. The plain silk borders it and furnishes collar and cuffs.

A NATURAL MISUNDERSTANDING

"I really believe," said Miss Mattie May, "that I'm not capable of criticizing anything I see on the stage except the gowns. I saw an actress the other night who had rather a pretty gown, but the yoke spoiled it."

"Jove! you don't say!" exclaimed Knight Stanz, the tragedian. "Who threw it?"

"Threw what?"

"The yoke."—Philadelphia Press.

SULPHUR BRINGS HEALTH.

Purifies the Blood and Clears Up the Complexion.

Everybody needs to take Sulphur at this season. Nothing like it to purify the blood, clear up the complexion and remove "that tired feeling." But the only way to take it is in liquid form. Hancock's Liquid Sulphur taken internally is the best Spring tonic. Applied externally Hancock's Liquid Sulphur quickly cures Eczema, Tetter, and all Skin Diseases. Hancock's, the only Liquid Sulphur Ointment, removes Pimples, Blackheads and Sores, and gives a beautiful soft, velvety skin. Your druggist sells it. It cured Edward D. Herring, of Frederick, Md., of a bad case of Eczema, and he writes: "My face is as smooth as an infant's."

All about Sulphur Booklet free, if you write Hancock Liquid Sulphur Co., Baltimore.

IRISH HOPEFULNESS.

Sure, Things Are Never So Bad but They Might Be Worse.

The Irishman sees everything through rose colored glasses, says a writer in the Guardian. He is supported, too, by a simple, sturdy faith, a spirit of resignation and unworshipfulness worthy of the saints of old.

The dread blight had fallen on the fields in most of the district where we were visiting in Ireland, and the potato vines hung limp and brown. No word of complaint was spoken, and when the likelihood of famine was mentioned the answer came:

"Danger, ma'am? Yes, there is, indeed, but God is good. He'll find a way."

So, too, about the hay. The summer had been terribly wet, and for days the new mown hay had laid on the ground. It was an anxious time.

"What will you do," I said to Mike, "if this weather keeps up? Your hay will surely be ruined."

"Oh, please God, it won't keep up," he answered. "He'll send us a bright day soon, just to see how well we'll use it."

"What a glorious night, Mikey," I said to the boy, as he and I and the donkey drove home under the August moon.

"A fine night, indeed, ma'am. Thanks be to God for giving it to us!"

They showed us, on the road to town, a gentleman's place where, in a stretch of what not long since had evidently been thickly wooded land, stood stump after stump of giant trees. Four or five years ago, when the winter was exceptionally long and cold, the peasants suffered from scarcity of peat. They begged this landed proprietor to sell them wood, offering not only to pay his price but to fell the trees and carry them off. He refused.

Again and again they begged, for the suffering grew intense, but he would not let his hand be marred. One night there came a wind so frightful that it seemed for a time as if the "big wind" were blowing again. In the morning the highway along this proprietor's domain was impassable. Huge trees, blown to the ground, lay across the road for a distance of two miles, and the forest beauty was a thing of the past. The town authorities ordered the obstruction cleared away, and the peasants got for nothing more than they had been refused for pay.

"'Twas the hand of God was in that, ma'am," I was told, "for, with all the wind, not a poor man's cot was harmed, nor another tree on the countryside only those. God always looks after His poor."

A BAD RECOMMENDATION.

Lady (in draper's shop)—And is this color also genuine?

Assistant—As genuine as the roses on your cheeks, miss.

Lady—H'm! Show me another one, Tit-Bits.

DR. TALKS OF FOOD

Pres. of Board of Health.

"What shall I eat?" is the daily inquiry the physician is met with. I do not hesitate to say that in my judgment, a large percentage of disease is caused by poorly selected and improperly prepared food. My personal experience with the fully-cooked food, known as Grape-Nuts, enables me to speak freely of its merits.

"From overwork, I suffered several years with malnutrition, palpitation of the heart, and loss of sleep. Last summer I was led to experiment personally with the new food, which I used in conjunction with good rich cow's milk. In a short time after I commenced its use, the disagreeable symptoms disappeared, my heart's action became steady and normal, the functions of the stomach were properly carried out and I again slept as soundly and as well as in my youth."

"I look upon Grape-Nuts as a perfect food, and no one can gainsay but that it has a most prominent place in a rational, scientific system of feeding. Any one who uses this food will soon be convinced of the soundness of the principle upon which it is manufactured and may thereby know the facts as to its true worth." Read, "The Road to Wellville," in pkgs. "There's a Reason."

Gustav Tiede, of Cleveland, Ohio, is said to possess an original Rembrandt etching hitherto unknown to art historians.

Americans claim to make good steel, yet the blades the Saracens turned out hundreds of years ago would cut one of our own blades in two like butter.

The French Government is taking steps to stop the promiscuous wearing of foreign uniforms in France. The reason is that they are often used to promote and cloak fraud.

Dinizulu, the Zulu chief once widely known and feared in war, has a graphophone with which he entertains his guests. He has also an organ, built in England, on which he plays himself.

INTERPRETATION OF DREAMS.

Are There Prophetic Impressions of Coming Events?

H. D. Los Angeles, Cal.: Are there prophetic dreams foreshadowing future coming events?

In a certain respect there are such dreams, inasmuch as they sometimes are the reflections of our internal sensations, and therefore may reveal some incipient disease of which we are not conscious in the waking state. Physicians have therefore found that a dream a good means of diagnosis.

Does a patient complain of horrible nightmares? It is at least the indication of a morbid affection of the heart or the large blood vessels of the brain. These nightmares are produced by a defective blood circulation. A person dreaming that his limbs are transformed into stone runs the risk of having the limbs paralyzed at an early date. Conrad Gessner, dreaming that he was bitten on the right side of his body, inferred from the dream some lesion in that region, and a few days later there actually appeared on the spot dreamed of an anthrax, from which the celebrated naturalist died. Arnold de Villeneuve dreamed one night that he was bitten on the foot and the next day a cancerous ulcer developed there. These citations could be multiplied indefinitely. Hippocrates, Aristotle and a great number of modern physicians and physiologists have recognized the utility of interpreting the dreams of the patient. Hindu and Chinese physicians in particular avail themselves much of the dreams in their diagnosis. They divide the dreams into five classes, corresponding to the heart, the lungs, the kidneys, the liver and the spleen. According as there is repetition or inaction of the vessel the dream changes in nature. Thus, as to the heart, there is repetition if we dream of ghosts and monsters, inaction if of heavy light smoke. Repetition of the limbs is indicated by dreaming of armies, soldiers, figures; inaction, by plants, landscapes, difficult voyage, etc. This is, at any rate, a little more interesting than the vulgar interpretations of the dream book that tells us that a running donkey signifies misfortune and a crying donkey calamity.

But dreams are not only the true mirrors of our physiological and pathological state; they also betray the sleeper's frame of mind, reveal the thoughts with which he was occupied when awake, cause latent ideas to emerge above the threshold of consciousness, and to this are due the wonderful dreams in which poetry and music have been composed and even scientific discoveries made. As the attention during sleep is undisturbed by a great number of external perceptions, memory acts with a perfection never observed during the waking state. Thus it comes to pass that the facts or things which we thought entirely forgotten suddenly arise to our consciousness when asleep or assume the character of an intuition. This gave rise to the belief that dreams were of divine or supernatural origin, and the supposition that they foreshadowed future events. This erroneous view was fortified by another circumstance. In the dreams our personal spirit, as it were, in two, for as Descartes well remarks, the soul is incapable of reacting against the impressions made upon it by the senses, a state that causes us to look upon ourselves as strangers. We are, therefore, led to attribute to imaginary beings the words we ourselves mentally pronounce, the thoughts which engross our minds. Under the sway of a religious fear, of the belief in celestial spirits, we see those beings in the dreams, ascribe to them talks and acts in accordance with our own convictions with our own hopes or apprehensions. This explains those instances of presentiment, of which history tells us with superstitious awe. Anxiety or desire, vague and indefinite during the waking state, assume during sleep form and shape, and appear as visions which sometimes have happened to agree with the naturally foreseen reality. But as regards the so-called dreams foreshadowing future events independent of the cause referred to, the belief in their existence is without foundation whatever. They are either mere coincidences—and it is these that are cited over and over again—or the event after its occurrence is unconsciously related to some previous dream to which it is made to fit.—New York Tribune.

A Summer Vacation in Your Kitchen

Don't swelter this summer with the temperature at 110. Get a New Perfection Wick Blue Flame Oil Stove and have a cool kitchen. The
